Ans:- A good product manager typically has the following qualities:

- Strategic thinking and vision
- Customer focus
- Technical acumen
- Data-driven decision making
- Collaboration
- Adaptability
- Communication skills
- Leadership

4. Discuss the major changes you will make to the product in order to maximize functionality and efficiency.

Ans:- I can suggest some general approaches that could be used to maximize functionality and efficiency of a product

- User-centered design
- Streamline processes
- Leverage technology
- Collaboration: Foster close collaboration between cross-functional teams, such as design, engineering, sales, and marketing, to ensure that all aspects of the product are aligned and working together.
- Continuous improvement
- Focus on key features
- Lean development

5. Describe some of the most important inputs you take into account when crafting your product roadmap. Explain why you use them.

Ans:- A product roadmap is a high-level visual representation of a product's strategy and direction over time. When crafting a product roadmap, a product manager typically takes the following inputs into account:

- Company goals
- Customer insights
- Market trends
- Technical constraints
- Sales and marketing plans
- Team capacity

6. What excites you about product management?

Ans:- I don't have personal experiences but here's what typically excites product managers about the role:

- Making a difference: Product managers have the opportunity to shape and bring new products to market, which can have a significant impact on people's lives and businesses.
- Solving complex problems: Product management involves finding creative solutions to complex problems, which can be challenging and rewarding.
- Collaborating with cross-functional teams: Product management requires collaboration with teams such as engineering, design, sales, and marketing, which can be an exciting experience as it requires strong communication and leadership skills.
- Constant learning: Product management involves staying up-to-date with the latest market trends, consumer behavior, and technology developments, which can be exciting for those who enjoy learning and staying ahead of the curve.

7. What do you know about medius and why do you want to work with us.

Ans:- Medius is a global provider of cloud-based spend management solutions. The company offers a range of products to help organizations streamline and optimize their procure-to-pay processes, including invoice management, e-invoicing, and supplier portals.

8. How many months can you commit to this internship?

Ans:- Maximum as you allow

9. Tell me about yourself in detail including your strengths and weaknesses also highlight your future goals.

Ans:- Hello ,

My name is Varsha and I am a developer who works with Python and Django. I have a passion for technology and enjoy using my skills to build innovative solutions. With my experience and expertise in these technologies, I am well-equipped to tackle complex projects and deliver high-quality results. I am always looking for new opportunities to grow and challenge myself, and I believe that my background in Python and Django will be a valuable asset in any future endeavors.

10. What steps do you take in product management? Which teams do you coordinate with?

Ans:- Product management typically involves several steps and close collaboration with cross-functional teams. Here's a high-level overview of some of the key steps involved in product management:

- Market and competitor research
- Product definition and strategy
- Requirements gathering and prioritization
- Product development
- Product launch and marketing

And as I already said I have knowledge of django and python so I work as a backend developer
